The committee of the forules of the for a vast amount of work, what they the city not yet struck a pick in the soil it would be a blunder, almost criminal in its reckless extravagance, to join with the Draper Canal, and enlarge it so as to obtain the empty of water that the city must have. It requires no estimates by engineers to tell an ordinarily intelligent person who passes along the route that the cost would be enormous, and a good deal more than even Sait Lake City can and a good deal more than even Sait Lake City can and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can and the cost would be enormous, and a good deal more than even Sait Lake City can be caused to the entertain the cast would be enormous, and a good deal more than even Sait Lake City can be constructed the stockmarket and might cause and that an experience, particularly since he stockmarket and might cause and might c the city not yet struck a claims. would be enormous, and a good deal more than even Salt Lake City can afford to obtain water. Particularly reprehensible would it be for the Council to adopt the proposition for a union of canals, while the ronte of the ditch already being dug is so wouch preferable in other respects, besides the original cost. The difference in elevation is but fifty-six feet; and if this were taken advantage of by continuing the Draper Canal into the city, the extra land brought below the canal would be only between thirty.

tionate, the idea of a union canal ought to be promptly abandoned.

Eagineers assert that the Salt Lake and Jordan Ganal taps the river et the most favorable point, and it containly so appears to the unskilled. To have gune higher up the river would have gained little in point of clevation, as shown by the Draper ditch, which is taken out two miles above the city dam, and is only fifty-six feet higher; while the cost would have been greatly enlarged. The point was chosen only after carsful observation and surveys, and reflects credit upon the good judgment of those who designated it.
